

October 12th 2018: The 10th edition of the

Rendez-Vous de Concarneau :

Where Industry meets Science in marine biotechnology

The 'Rendez-vous de Concarneau' constitutes a series of yearly workshops aiming at promoting relationships and strengthening bridges between industry and academic research, and further at providing technology and knowledge transfer among stakeholders within European marine biotechnologies.

This year's focus is laid on innovative aquaculture systems and biomass production. We truly believe that conferences are a valuable platform to mobilize international cooperation in this young discipline.
